OHIO UPDATE: Department of Agriculture Announces Suspension of Enforcement on Broad "Pet Store" Interpretation

By AKC Government Relations

March 7, 2019

Today the Ohio Department of Agriculture (ODA) announced that they will suspend enforcement of a recent regulatory interpretation that would have required home-based dog breeders to obtain licensing as a pet store.

ODA has stated they will work with the Ohio General Assembly on a resolution.

The American Kennel Club worked with a number of policymakers regarding this issue. For more information about AKC's concerns, see a letter to ODA expressing AKC concerns with ODA's interpretation of the definition of "pet store" and its impact on home-based breeders.

AKC thanks the ODA for suspending enforcement on this issue and will continue to work with legislators for a permanent legislative solution. We will continue to provide more information in the coming weeks. For questions, contact AKC Government Relations at doglaw@akc.org.

Vitamin D Toxicity in Dogs

Vitamin D is an essential nutrient that helps dogs regulate the balance and retention of calcium and phosphorus. However, extremely high levels of vitamin D can cause serious health problems. Vitamin D is a fat-soluble vitamin, so unlike water-soluble vitamins, when a dog – or other animal - gets too much, the excess is not rapidly excreted in his or her urine. Instead, it's stored in fat tissue and the liver. Excessive vitamin D can lead to kidney failure and even death.

Causes

Dogs that eat pet food containing too much vitamin D can develop vitamin D toxicity. It can also occur if a dog accidentally gets into vitamin D supplements that a person in the household is taking. Another common way that dogs get vitamin D toxicity is after accidentally eating certain chemicals meant to kill rodents like rats and mice, called cholecalciferol rodenticides. Cholecalciferol is the chemical name for vitamin D3.

Signs of Illness

Dogs with excess vitamin D may vomit, have little appetite, drink and urinate more, drool excessively, and/or lose weight. Depending on the concentration of the vitamin D in the food, diet-related toxicity tends to develop more gradually over time. Cases of vitamin D rodenticide or supplement poisoning are rapid onset – showing signs of illness in a matter of hours or days.

If you suspect your dog is showing signs of vitamin D toxicity, take him or her to a veterinarian immediately.

Diagnosis

Only a veterinarian can diagnose vitamin D toxicity. He or she will evaluate your dog's signs, ask about what food the dog is eating and what the dog might have gotten into, and might take a blood sample to measure levels of calcium, phosphorus, and vitamin D or obtain urine to assess kidney function. Depending on the results of a veterinarian's examination, he or she will determine the best course of action.

Treatment

Treatment will depend on a veterinarian's assessment of each case, but the aim will be to remove the source of vitamin D to prevent additional exposure (e.g., stop the feeding of recalled dog food) and to flush the body of the excess vitamin D. In less acute cases of vitamin D toxicity that are caught early, the veterinarian may determine that a change of diet may help resolve the issue within weeks to months, or he or she may choose to prescribe medication. A veterinarian may also continue to monitor blood calcium and phosphorus levels until they return to a healthy baseline.

For Dog Owners

If your dog is showing signs of vitamin D toxicity such as vomiting, loss of appetite, increased thirst and urination, excessive drooling and/or weight loss, contact a veterinarian immediately. Provide a full diet history to your veterinarian, including what food you (or other household members) give him and also other food or items he might have gotten into. You may find it helpful to take a picture of the pet food label, including the lot number. If your veterinarian suspects the food is the source of excess vitamin D, having the lot code helps the FDA identify exactly when the contamination occurred and what other products might also be affected. This can help prevent other dogs from getting sick. Don't feed the products to your pets or any other animals

Dog owners can report suspected illness to the FDA electronically through the Safety Reporting Portal or by calling your state's FDA Consumer Complaint Coordinators. It's

most helpful if you work with your veterinarian to submit a dog's medical records as part of the report. For an explanation of the information and level of detail that would be helpful to include in a complaint to the FDA, please see [How to Report a Pet Food Complaint](#).

It's also helpful if you save the food in its original package, in case it's needed for testing. If testing is not needed, contact the company listed on the package for further instructions or throw the products away in a way that children, pets and wildlife cannot access them.

For Veterinarians

The FDA encourages veterinarians treating vitamin D toxicity related to diet to ask clients for a detailed diet history. We also remind clinicians that vitamin D toxicity may present as hypercalcemia, hyperphosphatemia, and/or renal failure. If you suspect that the pet food is the source of the excess vitamin D, we welcome case reports, especially those confirmed through diagnostics. We ask that you not tell the pet owner to discard the left-over food, but instead to retain it in a safe place and not feed it to their pet or any other animal.

Reports to the FDA can be submitted through the Safety Reporting Portal or by calling your local FDA Consumer Complaint Coordinators. For submissions through the Safety Reporting Portal, when asked "Who are you?" please select, "A private citizen/business submitting a voluntary report," on the selection screen in order to guide you through a veterinary submission. For an explanation of the information and level of detail that would be helpful to include in a complaint to the FDA, see [How to Report a Pet Food Complaint](#).

COLRC All-Breed Eye, Heart & DDC Veterinary Genetics Clinic

Sunday, May 5, 2019

Don Mann DVM Veterinary Clinic

5110 Cheshire Road (at the intersection of Cheshire and Africa Roads)
Galena, OH 43021

For directions, go to their website at <https://mannvetclinic.com/>, go to the menu, then "Contact Us" page. You can put in your address and get directions to the clinic.

For the safety of dogs and people, dogs are to stay in owner's vehicle until exam please.

******For questions, directions or cancellations DAY OF CLINIC ONLY, call Jennifer Stotts at 740-819-1607 or the clinic at 740-548-6669. If you are not coming, be considerate of others and let us know!!!******

Eye Exam Clinic

Anne Gemensky Metzler, DVM, MS, Diplomate ACVO

NOTE: Scheduling by appointment only: 8:00-4:00; OFA forms will be provided which are accepted by CERF and OFA

Exam cost: \$40 per dog/\$7 additional charge for breeds that must be examined before and after dilation

(Australian Shepherd, Basenji, Mastiff, Pembroke Welsh Corgi, Dalmation)

There is a discount for litters – call or email for info on pricing.

Contact: Jennifer Stotts – shannonlabradors@yahoo.com or 740-828-2657

HEART Clinic

Karsten Schober, DVM, PhD, Diplomate ACVIM (Cardiology)

Note: Scheduling by appointment only: 9:00 A.M. – 3:00 P.M.

Auscultation Exam cost: \$40

The doctor will bring OFA forms for owners to submit if desired.

PLEASE NOTE: OFA WILL NOT REGISTER HEART FORMS FOR DOGS UNDER 1 YEAR OF AGE

CONTACT: Jennifer Stotts – shannonlabradors@yahoo.com or 740-828-2657

DDC Veterinary Genetics discounted testing

The first test on a dog will be discounted to \$45 (\$13 off) and each additional test on the SAME dog will be \$20 each. Please visit www.vetdnacenter.com to see what tests are available for your breed. Testing can be done with cheek swabs provided at our clinic. Owners will be required to swab their own dogs with assistance. Ordering **must** be done **at the clinic** in order to qualify for the discount. Forms will be available at the clinic.

CONTACT: Jennifer Stotts – shannonlabradors@yahoo.com or 740-828-2657 to schedule so we have an approximate number.

NOTE: COLRC can accept credit cards with a 3% fee.

This health clinic is sponsored by The Central Ohio Labrador Retriever Club (www.colrc.com)

Central Ohio Labrador Retriever Club

Back-to-Back Specialty Shows

October 26 & 27, 2019*

Delaware County Fairgrounds
Delaware, Ohio

Saturday, October 26

JUDGES: Sharon Celentano, Shar-Jam
Jared Frasher, Lakeside (Sweepstakes)

Sunday, October 27

JUDGES: Marion Daniel, Mar-Moye
Sara Greenburg, Fairlane (Sweepstakes)

Closing Date: October 09, 2019

The Labrador show will be in its own building with plenty of room for seating and crates. There will be lots of parking for cars and RV hook-ups are available. Join us for some great silent auction items and hospitality!

Pending AKC Approval

General COLRC Information

The **UNLEASHED!** is a publication by and for the members of the **Central Ohio Labrador Retriever Club** and others interested in the betterment of the sport and advancement of cooperative communication within the Labrador community and the dog fancy.

The articles and information contained in this publication have been deemed by the editor to be of interest to our readers but do not necessarily reflect the beliefs or the opinions of the editor or COLRC members. Reader input is actively solicited.

Please address or email all articles, announcements, comments and suggestions to newsletter@colrc.com. Unleashed is published ten to twelve times per year. Closing for each issue is the 20th day of the month prior to publication.

Dues are \$25 annually for a single membership and \$40 for a joint membership. Business cards will be placed on the COLRC website for the year at a cost of \$50 for members and non-members.

Club members who wish to utilize the Litter Listing Column of the newsletter and website will be required to pay \$50 per litter listing unless they have worked at two of our three club events during the course of the year.

Meetings General meetings shall take place the first Wednesday of every month unless otherwise noted.
